

Problem / Solution Development

Evidence

- Sound Control
- Natural Lighting
- Private Rooms
- Color
- View
- HEPA filters
- Surveillance
- Care Coordination
- Telemedicine
- Hand Washing
- Magnet Hospitals – leadership, nurse autonomy, and nurse/physician collaboration

Community Goals

- IOM 6 Goals: Effective, Efficient, Equitable, Safe, Patient-Centered, Timely
- Hughes Spalding
 - Specialty Care: Asthma, Sickle Cell, and Child Advocacy
 - Primary and Emergency Care
 - Concern for privacy
 - Warm and comforting environment
 - Concern for cost saving design
 - Centralized Triage - need to provide appropriate levels of care for patients
 - Transfer and continuity of care between caregivers

* Reviewing the Hughes Spalding website and mission statement will help to understand their community goals

* Collect Hughes Spalding data to create data-driven designs

Benchmarking / Best Practices

- Scientific evidence is not required
- Observations that can be used for new ideas and innovations
- Look outside healthcare for innovative ideas that can be applicable to the hospital setting
- Can be quantitative – ex. Size of patient rooms, number of single rooms, ect.
